Aberrant fréooooooooot !!!!!

The problem.

Organizer need quick and easy money

But traditional banks hate nightlife

They always say no

We built... **bangerz**

How It Works.

1. Pool

Lenders deposit funds and get a digital ticket.

2. Borrow

The host puts 20% of their own money on the table as a security deposit.

3. Return on investments

The host pays back the loan with interest, and everyone gets their money back, plus a bonus.

Summer Camp

📍 LAPLAGE, Paris 75016

FIXED YIELD

11.5%

TENOR / LOAN

How It Works.

1. Pool

Lenders deposit funds and get a digital ticket.

 **Verified Organizer**

2. Borrow

The host puts 20% of their own money on the table as a security deposit.

Summer Camp

 LAPLAGE, 75019 Paris, France  LAPLAGE  **sam 12 sept.** de 06:00 à 16:00

3. Return on investments

The host pays back the loan with interest, and everyone gets their money back, plus a bonus.

 **20% Collateralized**

How It Works.

1. Pool

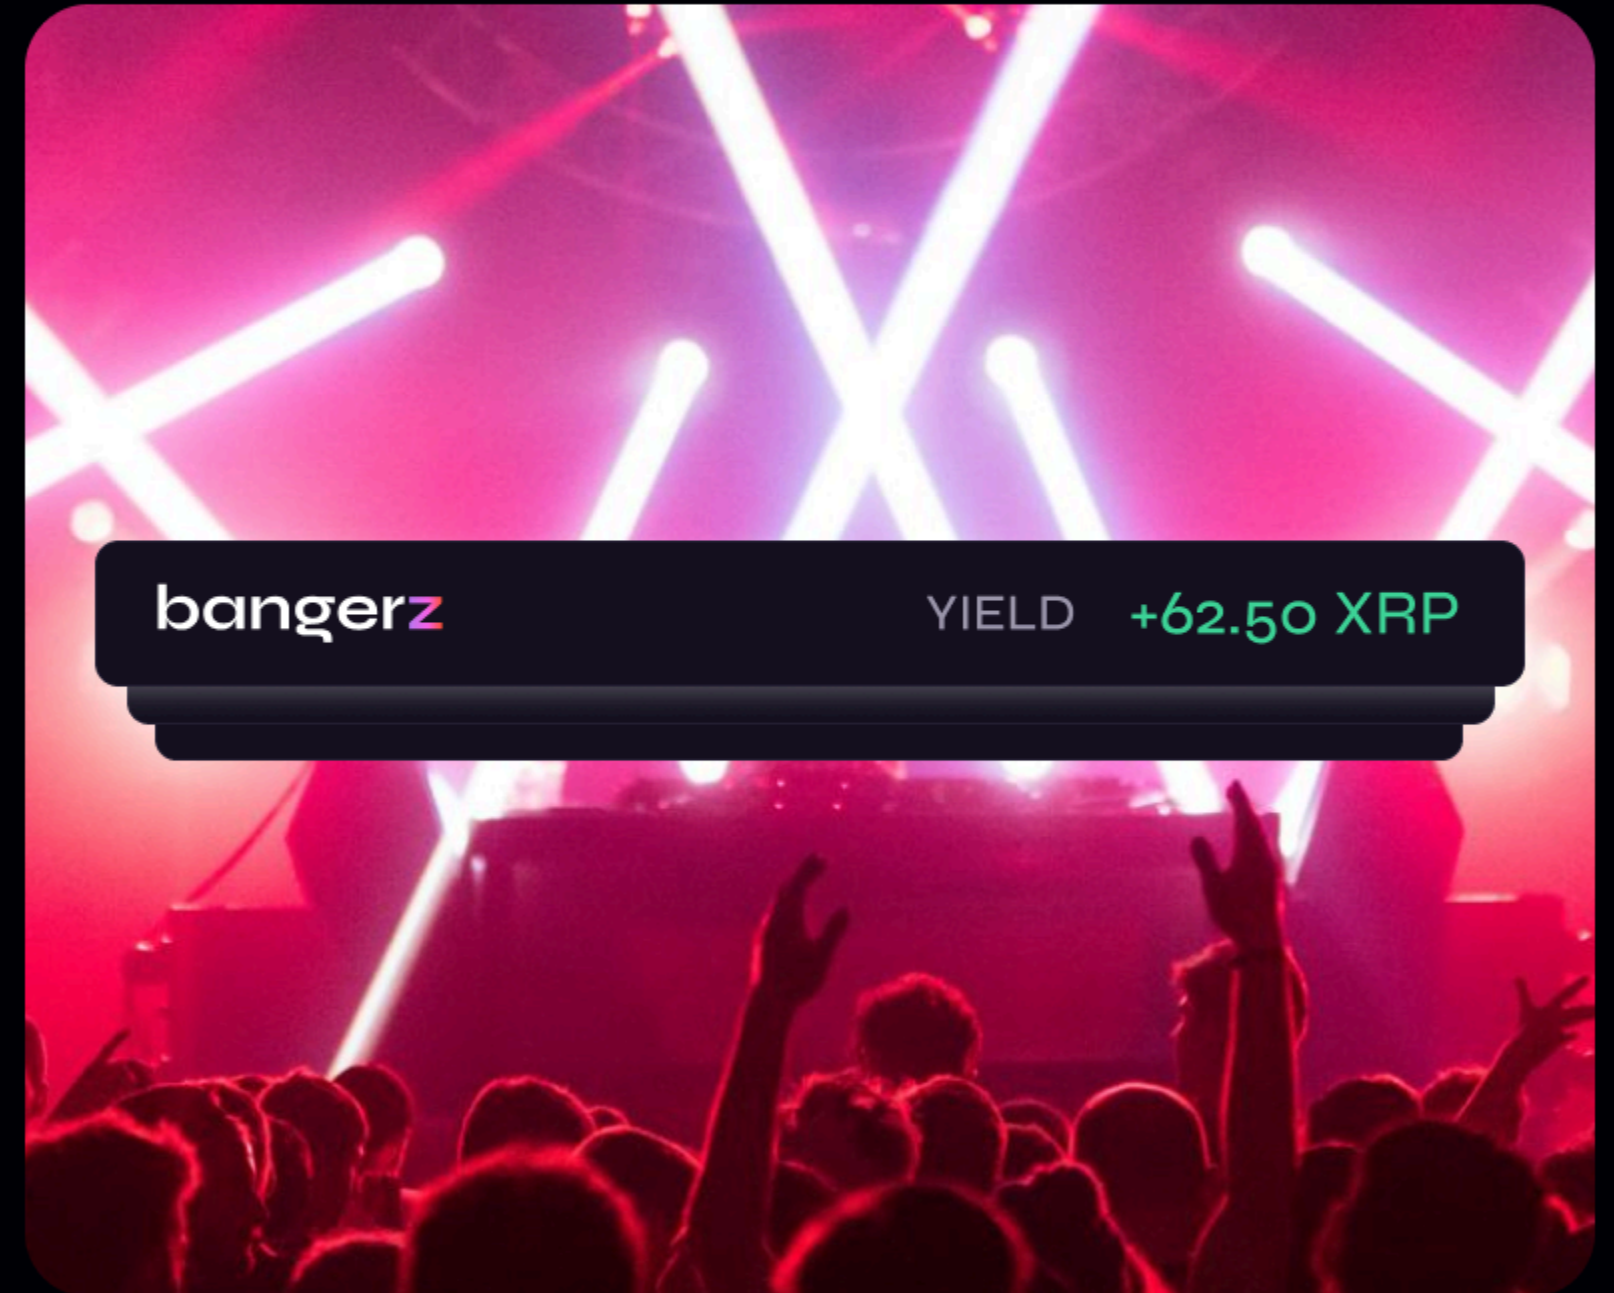

Lenders deposit funds and get a digital ticket.

2. Borrow

The host puts 20% of their own money on the table as a security deposit.

2. Return on investments

The host pays back the loan with interest, and everyone gets their money back, plus a bonus.

bangerz dev journey !

Error codes need more context

When a transaction is rejected because of timing, the ledger simply returns a raw code like tecEXPIRED or tecTOO_SOON.

The hidden late payment flag

Paying back an installment even a few seconds after the due date fails immediately unless you provide an undocumented flag (tfLoanLatePayment).

Yield is fully automatic

Early planning materials mentioned a manual donation flag (tfVaultDonation) that actually does not exist.
